## Key Assessment and Management of: Mechanical Catheter Complications

Lower Than Expected  
Dialysate Drain Volumes

Obvious Pericatheter Leakage

External Catheter  
Tubing Damage

This algorithm  
has been reviewed by:

**Dr. Lim Chiao Yuen**

Consultant Nephrologist  
Head of Nephrology Department  
Department of Renal Services  
Ministry of Health, Brunei Darussalam

**Dr. Deane Cedraz**

MD, MSc, Nephrologist  
Sr. Manager, Medical Affairs Renal  
Care [PD and HD] & Acute Therapies,  
Baxter APAC

# Lower Than Expected Dialysate Drain Volumes

Outflow failure – Is it due to constipation?

## Treatment

### Oral laxatives

Review bowel habits with patient.  
Oral laxatives are needed to treat or  
prevent constipation which can impair  
the dialysate flow.

**Baxter**

# Lower Than Expected Dialysate Drain Volumes

**NO** Inflow good?

Inflow good?

# Lower Than Expected Dialysate Drain Volumes

NO

YES Causes

**CAUSES** [please click on below's causes to see treatment options]

## Catheter malposition/ migration

### Treatment options

- Radiologically guided manipulation
- Laparoscopically directed interventions
- Simultaneous catheter replacement

**Baxter**

## Extraluminal catheter obstruction from adhesion band

 Treatment options

- Laparoscopic intervention
- Surgical lysis
- Catheter repositioning / replacement

**Baxter**

Lower Than Expected  
Dialysate Drain Volumes

Outflow failure – Is it due to

CAUSES (please

malpos

catheter  
om  
bing

## Extraluminal catheter obstruction from omental wrapping

### Treatment options

- Suturing of omentum to abdominal wall [omentopexy]
- Omentectomy

**Baxter**

# Lower Than Expected Dialysate Drain Volumes

NO

NO

Causes

**CAUSES** [please click on below's causes to see treatment options]

## Catheter kink

### Treatment options

- Catheter manipulation via fluoroscopic guidewire
- Laparoscopic intervention
- Surgical manipulation

**Baxter**

## Intraluminal catheter occlusion (often by thrombus)

 **Treatment options**

Flushing catheter with normal saline or heparinised saline

**Baxter**

Lower Than  
Expected  
Drain Volumes

Outflow failure – Is it due to

CAUSES (please

## Failure to dislodge intraluminal debris by brisk irrigation of catheter?

### Treatment options

- Thrombolytic therapy such as tissue plasminogen activator (tPA) for blood clot lysis

**Baxter**

# Obvious Pericatheter Leakage

\* Leaks that occur  $\leq$  30 days post catheter  
implantation and start of PD

\*\* Leaks that occur  $>$  30 days post catheter  
implantation and start of PD

# Obvious Pericatheter Leakage

- ▶ Early leak\* ▶ Dramatic leak from exit site and/or insertion incision?

Dramatic leak from exit site and/or insertion incision?

\* Leaks that occur  $\leq$  30 days post catheter implantation and start of PD | \*\* Leaks that occur  $>$  30 days post catheter implantation and start of PD

Obvious  
Pericath  
Leakage

Early leak\*  
/ Late leak\*\* ▶ Early

NO

YES

 **Treatment**

Immediate surgical referral for possible exploration for suture failure

**Baxter**

# Obvious Pericatheter Leakage

NO

Did the leak resolve with temporarily discontinuing dialysis for 1-3 weeks?

Did the leak resolve with temporarily discontinuing dialysis for 1-3 weeks?

\* Leaks that occur  $\leq$  30 days post catheter implantation and start of PD | \*\* Leaks that occur  $>$  30 days post catheter implantation and start of PD

 **Treatment**  
For further investigation.

**Baxter**

# Obvious Pericatheter Leakage

- ▶ Late leak\*\*
- ▶ Ultrasound or Computed Tomography [CT] scan

**ULTRASOUND OR COMPUTED TOMOGRAPHY [CT] SCAN**

Obvious  
Pericath  
Leakage

Early leak\*  
/ Late leak\*\* ▶ Late

ULTRASOUND

## Treatment options

- Pericatheter hernia repair
- Simultaneous PD catheter replacement

**Baxter**

## Obvious Pericath Leakage

Early leak\* / Late leak\*\* ▶ Late

ULTRASOUND

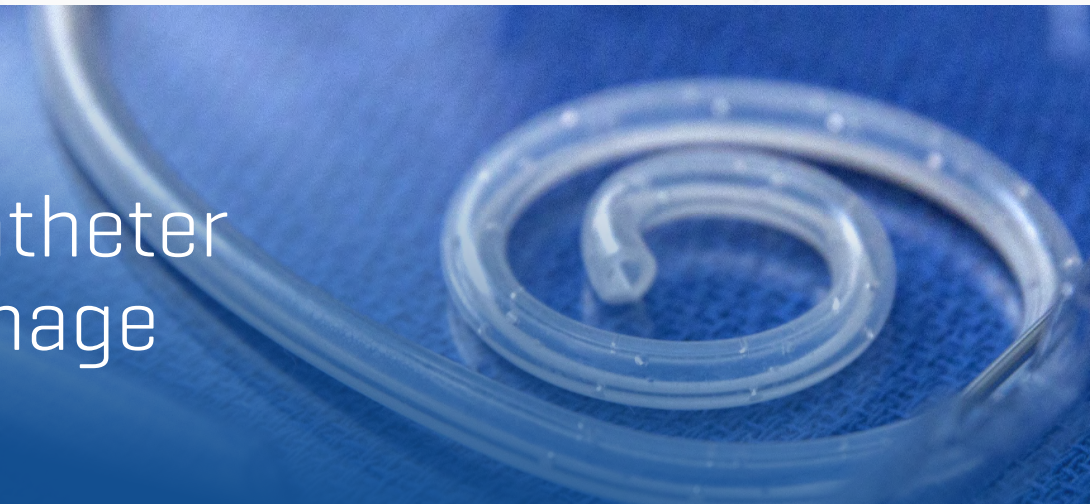

### Treatment options

- Remove catheter
- Interim HD

**Baxter**

# External Catheter Tubing Damage

Sufficient length of external tubing for repair?

# External Catheter Tubing Damage

YES

Repair external tubing, investigate peritonitis and treat as per clinic protocol. Peritonitis resolved?

Repair external tubing, investigate peritonitis and treat as per clinic protocol. Peritonitis resolved?

# Key Assessment and Management of: Mechanical Catheter Complications

Lower Than Expected  
Dialysate Drain Volumes

Obvious Pericatheter  
Leakage

External Catheter  
Tubing Damage

External  
Tubing D

Sufficient length of  
external tubing for repair

NO

## Treatment

Resume catheter care and observation

YES

**Baxter**
